Introducing Phrazer®- OS Shannon

The novel, CITE OS that pioneers a new standard in critical communication, hyper human and machine enhanced services will do honor and pay homage to the founder of Information Theory, the great Claude E. Shannon. Phrazer's OS Shannon, release v1, October 15, 2018 introduces new Multi-path Realtime Messaging features to the world's only medical grade, purpose built Operating System. The OS Shannon provides many new to the world features and capabilities. Here we list a few of the most impressive features for a taste of the future of ethical, effective care:

Multi-path Realtime Messaging (MRM)

OS Shannon enables new levels of Information Theory benefit to effectively engage patients, staff, and health records in a high value novel way for unprecedented accuracy, efficiency and efficacy.

Kitsune II Integration

OS Shannon fully incorporates the dynamic, wearable medical Kitsune II with extreme ease of use and innovative adaptation.

Global Leader in Security

OS Shannon is the only medical grade OS that has never been compromised, has no open ports, is single source, secure and completely interoperable without 3rd parties. This release introduces deeper encryption and security than ever before.

Expanded Stability Leadership

OS Shannon powers one of the world's most capable, high speed quad-core processors and largest memory stacks. Designed specifically and only for medical use means total stability.

Unlimited Battery Service

The OS Shannon's new cascading power switching system and hot-swap functionality keeps it running wire free for unlimited battery use.
New Standards Interoperability

As part of the MRM services OS Shannon adds expanded on-board drivers for all major printers, EMRs, Network Access Points, Encryption, Data Services and more fully out-of-the-box ready.

Proximity & Mesh Enhanced

Leveraging and powering the Kitsune II processor, OS Shannon creates realtime mesh networks for never before possible benefits of staff accountability, messaging and location awareness features.

The Value of Medical Grade OS
Top 10 Powered by OS Shannon Benefits

Highest Medical Security

Secure PHI, build trust and reputation and save millions
The un-compromised Shannon OS comes with world leading security without special adaptation by the enterprise. The only secure, purpose designed and un-hacked OS for medical use.

High Speed/Low Cost CITE

Innovation from staff at no extra cost due to OS efficiency
Shannon OS includes the streamlined foundation for rapid inclusion of innovative CITE engagements your novel staff and system benefit. Staff will innovate, achieve goals and implement securely, quickly and across all demographies.

Single Source Compliant

One point of compliance ensures all elements are HIPAA
The OS, UIs, update mechanisms, data storage and more are fully, inclusively and single source complaint. No license agreements, extensive audits or hidden risk points.

Low Cost of Ownership

One point means no cascading, costly updates
This is a platform that requires no training, features single point security and costs less than paper. No deprecating code, rugged, no disposables, built to last years without degradation.

Secure Open Handset Alliance Services

Specialty "Apps" on a secure platform
If you have programs running on un-secured disposable consumer platforms but you wish to keep them; Shannon OS directly and exactly ports these to a stable medical platform.

Medically Interoperable

Shannon is designed to "talk" with your utilities
The drivers needed to operate with your devices, utilities, printers and more are incorporated and connect-ready on Phrazer/Kitsune's secure platform.

EMR Ready

Via integrator or direct, Shannon connects
Via HL7, APIs or secure data exchange, OS Shannon's purpose built foundation ensures the connection is achieved on time and budget. Shannon is pre-connected with popular integrators for go-live interchange without new sockets.

Point Solution Consolidation

Superfluous point solution burden elimination
Cumbersome computers on wheels, inadequate translation solutions, scribe solutions and more are effectively encapsulated on this one medical, safe, secure platform.

Regulatory

The only safe, secure and constitutionally compliant
From HIPAA to infectious disease control and from full audit features to total Civil Rights coverages, Shannon OS keeps patients and staff safe while complying with regulation.

The Patient

Patients overwhelmingly prefer and benefit
A solution that adapts to all languages, literacies, cultures, genders and more on one efficient, safe, inclusive platform is the top reason for Phrazer/Kitsune with Shannon OS.
