Emergency Department
Current State Challenges

137 Million

Emergency Department visits annually

Highest number of visits made by persons between age

25-44

60-90 min

Average wait time to see a provider

75%

of the time in the care area is not spent interacting with providers

Overcrowding and Diversity

as challenges for patient flow and throughput

25%

of physician time is direct care

31%

of physician time is spent charting

Phrazer Enabled Emergency Department
The Solution

With Phrazer, all locations in your emergency department become active care zones. Patients are immediately and equally engaged with Phrazer and are providing or receiving relevant information for their care. Staff is simultaneously provided key information via Multi-Path Real-Time Messaging (MRM) and the EMR is populated accurately.

Phrazer Program

Phrazer offers any CITE engagement in any language including:

- Registration
- Triage
- Chief Complaint
- Informed Consents
- Pain Management
- Social, Past Medical, Family History
- Medication Reconciliation
- Patient Education
- Patient Experience Survey
- Competency Development (staff)

Benefits

The Phrazer System utilizes novel CITE Methodologies and patented features offering the following benefits:

- Equal Engagement and Civil Rights Coverage
- Fastest Speed to Treat
- Reduction of Charting Time
- Harmonized Patient Flow
- Platform for Innovation
- Secure EMR Connection
- Consolidation of Point Solutions
- Novel Revenue Pathways
- Operationalization of Previously Challenging Processes

Harmonized Patient, Staff and System Performance
